//PROFESSIONAL SUMMARY

From the moment I produced my first Todoapp, I knew I was hooked into the world of software development. Software development was never just a job. It's a constant challenging experience that pushes me everyday to learn more and improve your skills. Bellow you will find projects I've completed this year that showcase my skills in development.

//PROJECTS

élBoutik // Full-Stack E-commerce Web Application
//https://elboutik.herokuapp.com/
- Created a full-stack e-commerce website that is able to handle and integrated secure payments, routes, noSQL database and oAuth. The goal was to use the project for future similar work, and adapt to my sister's business own needs for payment integration.
- Technology: React, Hooks, Express, Mongodb, NodeJS, Paypal and Heroku.

CatCon //Contact Web App// https://molk95.github.io/friendContact/
- Created a simple React app linked with a fake REST API JSONPlaceholder where you can search contacts. This app was prepared was prepared to teach other students and learn React basics.
- Technology: React, Redux, REST API
